Games programmer specialising in Gameplay and Tools, primarily C++. Shipped projects in UE5 and custom C++ engines across teams of up to 25 people, with experience on PC, PS5 and Nintendo Switch. Looking for an internship from September 2026.

Technical Skills

- **Languages:** C++, C#, C, HTML/CSS/JS, PHP
- **Engines:** Unreal Engine 5, Unity, GameMaker Studio
- **Specialties:** Procedural Content Generation, Tools, Gameplay Systems
- **Tools:** Visual Studio, Visual Studio Code, Git, GitHub Actions, Perforce, Jira, Confluence, Miro, Agile/Scrum
- **Spoken Languages:** English (Fluent), Dutch (Native)
- **Platforms:** Windows, PlayStation 5, Nintendo Switch

Game Projects

Hydraulic Erosion Simulation - C++, OpenGL – 8-Week Project, Solo Dec 2024 - Jan 2025

- **A terrain editor** made in a **custom C++ engine**. Built a **particle-based erosion simulation**, **brushes** to edit the terrain and rendered the terrain using **tri-planar projection**. **Project here**

Suck it Up! - Unreal Engine 5, C++, Blueprint - 24-Week Project, Team of 25 Feb 2026 – Jun 2026

- An adventure game published on **Steam** made in **Unreal Engine**. I worked on **enemy behaviour, procedural animations** and **gameplay systems**. **Project here**

Wasteland Walkers - Unreal Engine 5, C++, Blueprint - 8-Week Project, Team of 12 Apr 2024 - Jun 2024

- Local multiplayer game where you work together to steer your robot through a wasteland. Created **Procedurally generated levels** using **Voronoi diagrams** and **UE PCG**, including obstacles, objectives and enemy spawners. **Project here**

Bloom - Unreal Engine 5, C++, Blueprint - 8-Week Project, Team of 14 Apr 2025 – Jun 2025

- A game about fighting and farming evil plants. Built **plant growth, fruit, watering and attack systems** and **caretaker AI**. **Project here**

FireAnt Engine - C++, OpenGL - 8-Week Project, Team of 7 Feb 2025 - Apr 2025

- **A custom RTS game engine**. Created **cross-platform support** with the **Nintendo Switch**, an **in-engine UI editor**, **GitHub CI/CD pipeline.** **Project here**
